**Pupil Dilation Waiver**

In order to thoroughly examine the internal health of the eye, it is necessary to enlarge the pupil of the eye (dilation). This technique allows the doctor to observe the peripheral area of the retina that would otherwise be hidden from view. Many correctable problems can be detected this way. Dilation is accomplished through the use of eye drops. The drops’ effects may last from two to twelve hours. You may experience blurred vision for reading. Your distance vision will usually not be blurred, but may seem a little distorted. The drops will also cause light sensitivity, and you will be given a pair of sunglasses to wear to relieve this effect. You will be able to drive after dilation, but you should use extra caution. This applies to all physical activities, such as walking, climbing stairs or curbs, etc.

Complications from dilation are extremely rare. If you should experience any unusual pain or discomfort after the dilation, you should call the office immediately. If the office is closed, call the emergency consultation number given.

You have the right to refuse dilation as well as any other medical procedure.

I hereby agree to have my eyes dilated. Signed_________________________ ___/___/____

I request not to have my eyes dilated. Signed_________________________ ___/___/____
